

Module 7

Equipment Maintenance Checklist

Regularly maintaining your equipment will save you hundreds, if not thousands, of dollars.

This checklist is the starting point for your equipment, but you should always check the owners manual along with the salespersons recommendations for a full list of scheduled maintenance requirements. Each machine or vehicle will have a specific timeline attached for when items need replacing.

Pressure Washer

- Check Oil (pressure washer engine)
- Change Oil (pressure washer engine)
- Check Oil (pressure washer pump)
- Change Oil (pressure washer pump)
- Fuel Filters Replaced Bi-annually
- Pressure Washer Air Filter
- Check o-rings on hoses and wands for excessive wear & tear. Toolbox stocked with extras.
- Safety Data Sheets are up to date

Vehicles

- Check Oil
- Change Oil
