1.3 Safety Plan

Having a plan in order to keep everyone safe is an important necessity for every business. This course is not a complete guide as various governments will have different requirements. You must find your local requirements and complete a safety plan from them.

A health and safety program is a definite plan of action designed to prevent accidents and occupational diseases. Some form of a program is required under occupational health and safety legislation in most Canadian jurisdictions. A health and safety program must include the elements required by the health and safety legislation as a minimum. - CCOHS

**** Important Notices ***

* **All employees must receive a copy of your written safety program. Your company letterhead should be used as a cover for the program.**

* **A Safety Plan does not relieve you of responsibility for your employees.**

* **You must comply with all other safety guidelines as specified by your local, provincial/ state, and federal laws.**

+ MODULE 1 EXERCISES

1. Start to complete a business plan outline with the Business Plan Template. This will be completed throughout the course as modules have been completed.
2. Find out what your insurance rate per year is going to be.
3. Find out what the local Health & Safety Compliance regulations are in your area through the websites mentioned in 1.3 and outline a Safety Plan.
